REASON FOR ALLOWANCE

1. Claim 1-16 are allowed. The following is a statement of reasons for the indication of allowable subject matter: Carpenter (U.S. Patent Number 2,280,626) discloses a filter pump assembly for pumping and filtering a fluid including a pump subassembly having an inlet portion with a first cross-sectional shape and a filter subassembly. See Figures 1 of Carpenter. But, the reason Carpenter fails is because the filter subassembly does not have a filter element formed of a porous material for placement in covering relation to the cage member. Griffen et al. (U.S. Patent Number 5,202,021) discloses a filter element formed of a porous material for placement in covering relation to the cage member. See Figures 1-4. But, the reason Griffen et al. fails is because the filter subassembly of Griffen et al. would not have been obvious to one having ordinary skill in the art, at the time applicant's invention was made, to modify the device of Carpenter by incorporating a filter element formed of a porous material for placement in covering relation to the cage member as taught by Griffen et al., for the purpose of providing a filtering means as claimed. The improvement of the instant invention comprises a filtering pump assembly for pumping and filtering a fluid having a filter element formed of a porous material for placement in covering relation to the cage member.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee, and to avoid processing delays, should preferably accompany the issue
